# Indices des prix de l'industrie

Janvier 1992

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,  
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607)  
or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)
Montréal	(283-5725)	Edmonton	(495-3027)
Ottawa	(951-8116)	Calgary	(292-6717)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Newfoundland and Labrador	1-800-563-4255
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-263-1136
Manitoba	1-800-542-3404
Saskatchewan	1-800-667-7164
Alberta	1-800-282-3907
Southern Alberta	1-800-472-9708
British Columbia (South and Central)	1-800-663-1551
Yukon and Northern B.C. (area served by NorthwestTel Inc.)	Zenith 0-8913
Northwest Territories (area served by NorthwestTel Inc.)	Call collect 403-495-3028

## How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales, Statistics Canada, Ottawa, K1A 0T6.

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressés à:

Section des industries de biens et de services,  
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)
Montréal	(283-5725)	Edmonton	(495-3027)
Ottawa	(951-8116)	Calgary	(292-6717)
Toronto	(973-6586)	Vancouver	(666-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, **aux utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

## Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- <sup>P</sup> preliminary figures.
- <sup>r</sup> revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## NOTE

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data which is not included in this publication are available from CANSIM.

For further information write to CANSIM Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

## Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- <sup>P</sup> nombres provisoires.
- <sup>r</sup> nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## NOTA

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisée et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division CANSIM, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

## Highlights

### Industrial Product Price Index (IPPI)

According to preliminary figures, the Industrial Product Price Index (IPPI, 1986=100) edged up to 107.7 in January 1992 from December's level of 107.6. Of the 21 indexes for major groups of products, eleven increased while nine decreased and one remained unchanged. The main indexes contributing increases this month were paper and paper products (0.9%) and lumber, sawmill and other wood products (1.1%). A general factor in January was the 1.2% increase in the value of the U.S. dollar against its Canadian counterpart; this had an upward effect on prices of exported goods denominated in U.S. currency. In addition to the paper and lumber indexes, the main index affected was that for autos, trucks and other transport equipment, which increased 0.6%. The impact of these increases was partially offset by price decreases for petroleum and coal products (-1.6%) and meat, fish and dairy products (-0.6%).

Since January 1991, the IPPI has decreased 3.1%, the largest year-to-year decrease registered since 1956, when the complete set of price indexes for manufactured goods was introduced. This contrasts with the positive year-to-year change of 2.2% in January 1991. The major contributors to the twelve month change were the indexes for primary metal products (-7.5%), paper and paper products (-10.9%) and petroleum and coal products (-24.3%). Of indexes that increased over the year, those that had the biggest impact on the overall change were autos, trucks and other transport equipment (2.6%), tobacco and tobacco products (9.8%) and lumber, sawmill and other wood products (3.4%). The falls in the indexes for primary metals and for paper and paper products groups were the main cause of the change in the year-to-year decrease for first stage intermediate goods, which went from -2.5% in January 1991 to -10.2% in January 1992, after reaching a low of -14.3% in October 1991. On the other hand, the annual changes for second stage intermediate goods, which are affected by movements in petroleum prices, and for finished goods continued to fall. The twelve month change for finished goods (-0.3%), in January, was the lowest one registered since the introduction, in 1981, of price indexes by stage of processing. Excluding petroleum and coal products, the 12-month change was -1.4% in January.

The lumber, sawmill and other wood products index showed an increase of 1.1% in January due primarily to higher prices for softwood lumber and ties (2.2%) as well as veneer and plywood, softwood (5.3%). These increases were partially offset by a decrease in the sash, door and other millwork products index (-0.7%). Over the last twelve months, increases for softwood lumber and ties products (9.7%) were mainly responsible for the 3.4% increase in the lumber, sawmill and other wood products index.

The paper and paper products index increased by 0.9% in January. This is the first increase registered since September 1990. Although prices for pulp were up by 3.6% in January, they are still 22.8% below their level of twelve months ago. The newspaper and other paper stock group and the paper products group indexes were down 9.0% and 2.8% respectively from a year ago.

The primary metal products index increased by 0.4% in January, its first increase since September 1990. This was due primarily to higher prices for aluminum products (2.9%). Over the last twelve months, the primary metal products index has fallen 7.5% with declines ranging from 18.1% for aluminum products to 1.9% for iron and steel products.

According to initial estimates, the petroleum and coal products index fell by 1.6% in January due to lower prices for gasoline and fuel oil as well as for other refined petroleum products. On a year-to-year basis, the petroleum and coal products index declined 24.3% mainly as a result of lower prices for gasoline and fuel oils.

The meat, fish and dairy products index decreased by 0.6% in January due primarily to lower prices for pork, fresh or frozen (-4.4%). Over the last twelve months, the meat, fish and dairy products index has fallen by 2.6% mainly as a result of decreases in prices for pork, fresh or frozen (-16.8%) and beef and veal, fresh or frozen (-7.8%).

## Faits saillants

### Indice des prix des produits industriels (IPPI)

D'après les chiffres préliminaires, l'indice des prix des produits industriels (IPPI, 1986=100) se situait à 107.7 en janvier 1992 par rapport au niveau de 107.6 pour décembre 1991. Des 21 principaux groupes des produits, onze ont augmenté alors que neuf ont diminué et un est demeuré inchangé. Les hausses les plus importantes furent enregistrées dans les indices du papier et produits connexes (0.9%) et des sciages, produits de scierie et divers (1.1%). Un facteur additionnel a été la hausse de 1.2% du dollar américain face au dollar canadien en janvier, et son effet à la hausse sur les prix à l'exportation, cotés en dollar américain. À part des indices du papier et des sciages, l'indice qui a été principalement affecté fut celui des autos, camions et autre matériel de transport, qui a augmenté de 0.6%. Ces augmentations ont été partiellement contrebalancées par des diminutions dans les prix des produits du pétrole et du charbon (-1.6%) et de la viande, poisson et produits laitiers (-0.6%).

Depuis janvier 1991, l'IPPI a diminué de 3.1%, le plus bas taux de variation annuel enregistré depuis l'introduction, en 1956, de l'ensemble complet des indices de prix pour les produits manufacturés; un contraste avec le taux positif affiché en janvier 1991 (2.2%). Les principaux indices derrière la baisse annuelle ont été les produits métalliques primaires (-7.5%), le papier et produits connexes (-10.9%) et les produits du pétrole et du charbon (-24.3%). Parmi les indices qui ont enregistré une augmentation annuelle, ceux qui ont eu le plus grand effet modérateur sur le changement annuel ont été les autos, camions et autre matériel de transport (2.6%), le tabac et produits du tabac (9.8%) et les sciages, produits de scierie et divers (3.4%). Les diminutions dans les produits métalliques primaires et ceux du papier et produits connexes ont été aussi les principaux facteurs du changement important dans le taux annuel de variation pour les produits semi-finis de première transformation, qui est passé de -2.5% en janvier 1991 à -10.2% en janvier 1992 après avoir atteint son plus bas taux de variation en octobre 1991, avec -14.3%. Cependant, les changements annuels pour les produits semi-finis de deuxième transformation, qui sont affectés par les mouvements des prix des produits du pétrole, et ceux des produits finis continuent à diminuer. Le taux de changement annuel pour les produits finis, à -0.3%, est le plus bas taux de variation annuel enregistré depuis l'introduction, en 1981, des indices des prix par étape de transformation. Sans les produits du pétrole et du charbon, la variation sur douze mois a été de -1.4% en décembre.

L'indice des sciages, produits de scierie et divers a connu une hausse de 1.1% en janvier 1992, en raison principalement de l'effet de la hausse de 2.2% affichée par les prix du bois de construction, de résineux et celle de 5.3% par les prix du placage et contreplaqué, résineux. Ces augmentations ont été partiellement contrebalancées par une baisse dans l'indice des châssis, portes et autres produits ouvrés en bois (-0.7%). Au cours des douze derniers mois, l'augmentation dans les prix du bois de construction, de résineux (9.7%) a été le principal facteur du changement dans le taux annuel de variation pour l'indice des sciages, produits de scierie et divers (3.4%).

L'indice des prix du papier et produits connexes a augmenté de 0.9% en janvier. Ceci est la première hausse enregistrée depuis septembre 1990. Bien que les prix des pâtes de bois ont augmenté de 3.6% en janvier, ils ont chuté de 22.8% au cours des douze derniers mois. L'indice du groupe du papier journal et autres pâtes travaillées et celui des produits du papier étaient en baisse respectivement de 9.0% et 2.8%.

L'indice des produits métalliques primaires a augmenté de 0.4% en janvier, la première augmentation depuis septembre 1990. Cette hausse résulte principalement d'une augmentation dans les prix des produits d'aluminium (2.9%). Au cours des douze derniers mois, l'indice des produits métalliques primaires a chuté de 7.5%, avec des baisses allant de 18.1% pour les produits d'aluminium à 1.9% pour les produits du fer et d'acier.

D'après les chiffres préliminaires, l'indice des produits du pétrole et du charbon a diminué de 1.6% en janvier, reflétant des prix plus bas pour l'essence et le mazout ainsi que pour les autres produits raffinés du pétrole. Au cours des douze derniers mois, l'indice du pétrole et du charbon a chuté de 24.3% en raison principalement d'une baisse dans les prix de l'essence et du mazout.

L'indice de la viande, poisson et produits laitiers a diminué de 0.6% en janvier, en raison principalement d'une baisse dans les prix du porc, frais ou congelé (-4.4%). Au cours des douze derniers mois, l'indice de la viande, poisson et produits laitiers a chuté de 2.6%, principalement à cause des baisses dans les prix du porc, frais ou congelé (-16.8%) et du bœuf et veau, frais ou congelé (-7.8%).

## Highlights

### Raw Materials Price Index

Preliminary estimates for the Raw Materials Price Index (RMPI, 1986 = 100) showed a 2.4% decrease to 98.6 in January. The main contributor to this decline was the mineral fuels index which fell by 8.9%. Among the remaining components, the vegetable products index increased 1.4% and the animal and animal products index rose 1.0%. The RMPI excluding mineral fuels continued its upward movement started in December 91, with an increase of 0.7% this month.

In January 1992, the RMPI was down 15.7% from January 1991. The decrease was due to declines in six of seven components of the total index. The main changes were a 32.2% drop in mineral fuel prices and a 14.3% decrease in the non-ferrous metals index. The RMPI excluding the mineral fuels was down 5.6% in January 1992 compared to January 1991.

The mineral fuels price index fell by 8.9% in January as a result of lower prices for crude mineral oils (-9.7%). However, prices for natural gas and coal were up 2.3% in January. The mineral fuels index was down 32.2% from January 1991, due primarily to a 34.0% drop in the prices of crude mineral oils.

In January, the vegetable products index was up 1.4% from December. This was mainly due to increases in prices of wheat (5.0%) raw tobacco (5.3%) and corn (2.6%). However, the overall increase was moderated by a 4.0% drop in prices of unrefined sugar. Over the last twelve months, the vegetable products index fell 4.0% due primarily to drops in prices of fresh potatoes (-41.7%), unrefined sugar (-9.4%) and oilseeds (-6.9%). A 16.6% increase in wheat prices moderated the overall decline.

The animal and animal products index was up 1.0% in January. This increase was largely the result of higher prices for hogs (2.6%) and cattle for slaughter (3.9%). The animal and animal products index was down 6.3% from the same period last year, due primarily to a 25.6% drop in hog prices and a 13.4% decrease in the prices of cattle for slaughter. However, the prices of fish were up 12.4% in January 1992 compared to the same period last year.

The non-ferrous metals index was up 0.2% from December 1991. The main increases were a 5.2% jump in the prices of aluminum materials and a 3.9% raise in the prices of nickel concentrates. However, these increases were nearly offset by drops in prices of copper concentrates (-0.6%) and zinc concentrates (-6.2%). Over the past year, the non-ferrous metals index has decreased 14.3%. The main contributions to this decline came from lower prices for aluminum materials (-24.5%), concentrates of copper (-12.2%) and precious metals (-9.2%).

## Faits saillants

### Indices des prix des matières brutes

D'après les chiffres préliminaires, l'indice des prix des matières brutes (IPMB, 1986 = 100) était en baisse de 2.4% à 98.6 en janvier. Cette chute a été surtout causée par la diminution de 8.9% de l'indice des prix des combustibles minéraux. Parmi les autres composantes de l'indice global, notons la hausse de 1.4% des prix des substances végétales et de 1.0% des prix des animaux et substances animales. D'autre part, l'IPMB sans la composante des combustibles minéraux a poursuivi en janvier 1992 le redressement commencé en décembre 1991, avec une hausse de 0.7% par rapport au mois dernier.

En janvier 1992, l'IPMB était inférieur de 15.7% par rapport à janvier 1991. Cette diminution a été le résultat de baisses dans six des sept composantes de l'indice total. Parmi celles-ci, notons la chute de 32.2% des prix des combustibles minéraux et celle de 14.3% de l'indice des métaux non ferreux. L'IPMB sans la composante des combustibles minéraux a diminué de 5.6% entre janvier 1991 et janvier 1992.

L'indice des prix des combustibles minéraux a diminué de 8.9% en janvier suite à la baisse de 9.7% des prix des huiles minérales brutes. Par contre, les prix du gaz naturel et les prix du charbon étaient en hausse de 2.3% en janvier. Par rapport à l'an dernier, l'indice des combustibles minéraux a diminué de 32.2% surtout à cause de la chute de 34.0% des prix des huiles minérales brutes.

L'indice des substances végétales a enregistré en janvier une augmentation de 1.4% par rapport au mois dernier. Cette variation a été surtout causée par la hausse des prix de 5.0% pour le blé, de 5.3% pour le tabac en feuilles et de 2.6% pour le maïs. Cependant, la baisse de 4.0% de l'indice du sucre non raffiné a modéré la hausse globale. Au cours des douze derniers mois, l'indice des substances végétales a diminué de 4.0% en raison principalement des baisses des prix de 41.7% pour les pommes de terre fraîches, de 9.4% pour le sucre non raffiné et de 6.9% pour les oléagineux. L'effet de ces baisses a été modéré par la hausse de 16.6% des prix du blé.

L'indice des animaux et des substances animales a augmenté de 1.0% en janvier. Cette augmentation fut le résultat de la hausse de 2.6% des prix du porc et de 3.9% des prix des bovins envoyés à l'abattage. Par rapport à la même période l'an dernier, l'indice des animaux et des substances animales a régressé de 6.3%, principalement à cause des baisses de 25.6% des prix du porc et de 13.4% des prix des bovins envoyés à l'abattage. Par contre, les prix du poisson étaient 12.4% plus élevés en janvier 1992 qu'en janvier 1991.

L'indice des métaux non ferreux a augmenté de 0.2% par rapport au mois précédent. Les augmentations les plus significatives ont été observées pour les prix des matériaux d'aluminium (5.2%) et pour les concentrés de nickel (3.9%). Cependant, l'effet de ces hausses a été presque entièrement neutralisé par la baisse de 0.6% des prix des concentrés de cuivre et de 6.2% des prix des concentrés de zinc. Au cours de la dernière année, l'indice des métaux non ferreux a diminué de 14.3%. Cette baisse fut surtout le résultat de la chute de 24.5% des prix des matériaux d'aluminium, de 12.2% des prix des concentrés de cuivre et de 9.2% des prix des métaux précieux.

(1) Revised.

(1) Révisé.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total – tous les produits devra être considéré comme celui qui fait autorité, et l'indice total – toutes les industries manufacturières sera posé égal.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where

ss indicates the S-level commodity code (from 9 to 28)

mm indicates the M-level commodity code (from 14 to 43, 45 to 69)

nn indicates either a split of the M-level commodity,

or 91, which indicates a special aggregation

or 99, which indicates special details

pppp indicates the PCG code (except for some special aggregations which include several PCGs).

rr indicates a split of a PCG.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate.

For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to

the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling.

The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods

(Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de

CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique

prend la forme générale ss-mm-nn-pppp-rr où:

ss indique le code du niveau S des produits (de 9 à 28)

mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)

nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers

pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)

rr indique une composante d'un GPP

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un

échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de

couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La

mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices

les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: indices des prix des produits industriels

1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

## EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

### Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the *Daily Bulletin* release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

### Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

## EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES PRIX INDUSTRIELS

### Indice des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le *Quotidien* (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indice des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

### Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabilistes, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

## Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

## Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where  $w^i$  are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period o and time t for the defined aggregate;

$w^i$  is the transaction value of the element i in the base period;

$P_{t/o}^i$  is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$  indicates summation over all elements i in the defined aggregate.

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

## Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

## Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle  $w^i$  sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$  dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

$w^i$  est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$  est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

$\sum_i$  signifie la sommation de tous les éléments i dans l'agrégat défini.

## Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

## Reference Documents

62-558 Industry Price Indexes, 1986 = 100: users' guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

## Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

## Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: guide aux utilisateurs, \$40.00.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, \$25.00.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

## RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

## INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les Indices des prix des matières brutes mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w_i}{\sum w_i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period o and time t for the defined aggregate;

$w_i$  is the transaction value of the element i in 1986;

$P_{t/o}^i$  is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$  indicates summation over all elements i in the defined aggregate.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$  dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

$w_i$  est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$  est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

$\sum_i$  indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

L'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

## **ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100**

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

## **INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100**

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986=100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

## What happened to the cost of living last month?

**T**he Consumer Price Index will tell you.

Whether you negotiate wage settlements, administer COLA clauses in labour contracts, assess government policies or are involved in renewal contracts, child support or alimony payments, you need current and detailed information on changes in the cost of living.

Compiled monthly (and published within 20 days of the month's end), **The Consumer Price Index** gives you a precise account of the latest fluctuations in consumer prices.

This monthly publication covers:

- transportation
- health and personal care
- food
- recreation, reading and education
- clothing
- tobacco products and alcoholic beverages
- housing

Over 400 items, ranging from milk to parking, household furnishings to reading material, are included.

Price indexes are presented nationally and for 18 major Canadian cities. In each issue you receive month-to-month percentage comparisons and trends over the last five years. And each issue analyzes the main causes of change.

*Get the facts.*

Subscribe to **The Consumer Price Index** (Catalogue No. 62-001) for the authoritative measure of the purchasing power of the Canadian consumer dollar. A subscription to this monthly is available for \$93 in Canada, US\$112 in the United States and US\$130 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

## Qu'en était-il du coût de la vie le mois dernier ?

**L'**indice des prix à la consommation répond à votre question.

Que vous ayez à négocier des règlements salariaux, à administrer des clauses d'indemnité de vie chère ou à évaluer des politiques gouvernementales, que vous vous occupiez du renouvellement de contrats, de pensions alimentaires ou d'allocations d'entretien, vous avez besoin de données récentes et détaillées sur les fluctuations du coût de la vie.

Établi mensuellement, et publié dans les 20 jours suivant la fin de chaque mois, **L'indice des prix à la consommation** vous renseigne de façon précise sur les plus récentes fluctuations des prix à la consommation.

Cette publication mensuelle porte sur:

- l'alimentation
- l'habillement
- l'habitation
- le transport
- la santé et les soins personnels
- les loisirs, la lecture et la formation
- les produits du tabac et les boissons alcoolisées

Plus de 400 articles sont inclus, allant du lait au stationnement en passant par l'ameublement de maison et le matériel de lecture.

Les indices de prix sont donnés pour l'ensemble du pays et 18 principales villes canadiennes. Chaque numéro présente des comparaisons des pourcentages mois après mois et les tendances au cours des cinq dernières années. En outre, chaque numéro analyse les principales causes de changement.

*Abonnez-vous !*

**L'indice des prix à la consommation** (n° 62-001 au catalogue) vous permet d'obtenir une évaluation fiable du pouvoir d'achat du dollar canadien. L'abonnement à cette publication mensuelle coûte 93 \$ au Canada, 112 \$ US aux États-Unis et 130 \$ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

## Don't start your week without it

Get a jump on your work week by making sure you have the most current economic and social information in Canada. Travelling by first class mail or courier, Statistics Canada's digest, Infomat, arrives at the beginning of each week to help you monitor key economic indicators and keep up with the most current data releases from Canada's national statistical agency.

In eight fact-filled pages, Infomat highlights the findings of Statistics Canada surveys and brings them to your desk each week, often long before detailed reports are published. Throughout the year you'll get the first results of over 100 ongoing surveys and many special surveys—from manufacturing shipments to the health of Canadians or post graduate employment to part-time workers.

### Each week, Infomat presents you with,

- concise summaries of fresh facts from over 100 ongoing surveys
- charts and graphs that let you instantly scan the trends
- Overview - an outline of the subjects covered in each issue that you can scan in 30 seconds
- guidance on how to obtain special reports to assist you in your more detailed research.
- Current Trends and Latest Monthly Statistics sections that bring you up to date on the Consumer Price Index, Gross Domestic Product and 21 other key monthly series

Managers, analysts and researchers who are responsible for keeping up to date on changes in Canada's economic and social climate can count on Infomat — as a quick overview of the latest trends and as a weekly reminder of key indicators and data releases. Many subscribers use Infomat's highlights to add authority to their industry analyses, investment plans or corporate reports.

To order Infomat (11-002E), 50 issues annually for \$125 in Canada, US\$150 in the U.S. and US\$175 in other countries, write to Publications Sales and Service, Statistics Canada, Ottawa, Canada, K1A 0T6. For faster service, use your VISA or MasterCard and call toll-free in Canada, 1-800-267-6677.

## votre première lecture de la semaine

Commencez votre semaine de travail en vous assurant que vous avez sous la main les dernières informations économiques et sociales au Canada. Voyageant en courrier de première classe ou par messagerie, Infomat, le condensé de Statistique Canada, arrive au début de chaque semaine pour vous aider à suivre les principaux indicateurs économiques et vous tenir au courant des dernières données publiées par l'organisme national d'enquêtes du pays.

En huit pages remplies de données, Infomat présente les faits saillants des enquêtes de Statistique Canada et les dépose sur votre bureau chaque semaine, bien avant que des rapports détaillés ne soient publiés. Tout au long de l'année, vous avez les premiers résultats de plus de 100 enquêtes permanentes et de nombreuses enquêtes spécialisées, qui vont des expéditions des fabricants à la santé des Canadiens ou de l'emploi des diplômés universitaires aux travailleurs à temps partiel.

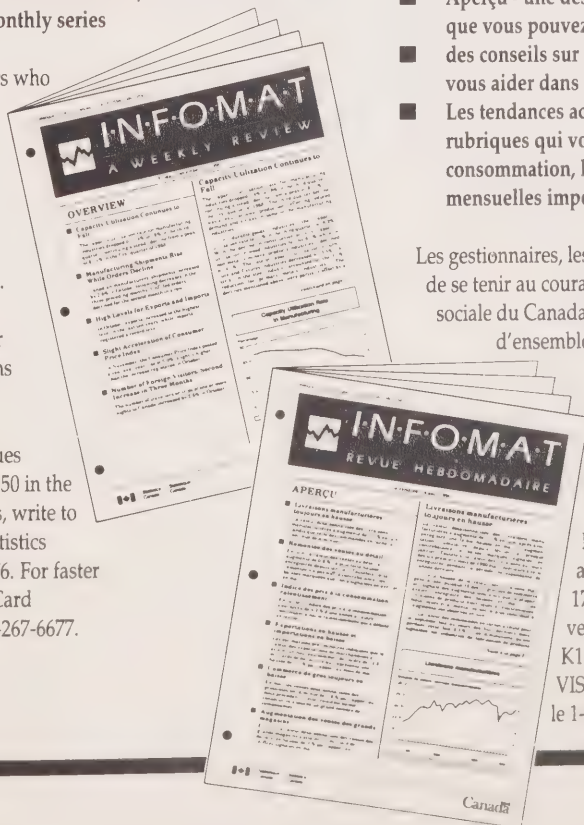

### Chaque semaine, Infomat vous offre :

- des résumés de faits tout récents provenant de plus de 100 enquêtes différentes
- des diagrammes et des graphiques qui vous donnent immédiatement les tendances
- Aperçu - une description des sujets traités dans chaque numéro, que vous pouvez parcourir en 30 secondes
- des conseils sur la façon d'obtenir des rapports spéciaux pour vous aider dans vos recherches plus poussées
- Les tendances actuelles et Dernières statistiques mensuelles, rubriques qui vous tiennent à jour sur l'indice des prix à la consommation, le produit intérieur brut et 21 autres séries mensuelles importantes.

Les gestionnaires, les analystes et les chercheurs qui ont la responsabilité de se tenir au courant de l'évolution de la conjoncture économique et sociale du Canada peuvent compter sur Infomat pour avoir une vue d'ensemble des dernières tendances et disposer ainsi d'un aide-

mémoire hebdomadaire des principaux indicateurs et données publiés. Plusieurs abonnés utilisent les faits saillants d'Infomat pour relever l'autorité de leurs analyses industrielles, projets d'investissements ou rapports financiers.

Pour commander Infomat (11-002F), 50 numéros par an pour 125 \$ au Canada, 150 \$ US aux États-Unis et 175 \$ US dans les autres pays, écrivez à Publications, vente et service, Statistique Canada, Ottawa, Canada K1A 0T6. Pour un service plus rapide, utilisez votre carte VISA ou MasterCard et composez sans frais au Canada le 1-800-267-6677.

# To those of you who need in-depth information about the labour market...

...Statistics Canada produces **Labour Force Annual Averages 1991** - a reference publication created specifically to meet those needs. With detailed data ... Quick-reference summaries and graphs ... Geographical breakdowns in unprecedented detail ... More variables and cross classifications than published in the monthly issues of *The Labour Force*.

The **Labour Force Annual Averages 1991** covers:

- an overview of changes that occurred in the service industries over the period 1976 to 1991;
- time loss and absenteeism by industry and province;
- full-time and part-time employment by industry and province;
- occupations for Census Metropolitan Areas (CMAs) and economic regions;
- industries for CMAs and economic regions;
- labour market participation and family responsibilities by provinces;
- and more.

**Labour Force Annual Averages 1991.** Part and parcel of Statistics Canada's customer-driven approach to business information.

**Labour Force Annual Averages 1991** (catalogue number 71-220) is available for \$39 in Canada, US\$47 in the United States and US\$55 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. Or contact the Statistics Canada Regional Reference Centre nearest you. (A list of centres appears in this publication.)

For faster service, FAX your order to 1-613-951-1584.

Or call toll-free 1-800-267-6677

and use your VISA or MasterCard.

# À ceux d'entre vous qui désirent obtenir de l'information plus détaillée sur le marché du travail...

...Statistique Canada présente **Moyennes annuelles de la population active 1991** - un document de référence créé spécialement à votre intention. Vous y trouverez des données détaillées, des sommaires et des graphiques faciles à consulter, des ventilations géographiques plus détaillées qu'auparavant et davantage de variables et de recoupements qu'il n'en paraît dans les numéros mensuels de *La population active*.

**Moyennes annuelles de la population active 1991** porte sur:

- un aperçu des changements qui sont survenus dans le secteur des services au cours de la période 1976 à 1991;
- les heures perdues et l'absentéisme, ventilés par secteur d'activité et province;
- l'emploi à plein temps et à temps partiel, ventilé par secteur d'activité et province;
- les professions dans les régions métropolitaines et les régions économiques;
- les secteurs d'activité dans les régions métropolitaines et les régions économiques;
- la participation au marché du travail et les obligations familiales selon la province;
- et bien d'autres.

**Moyennes annuelles de la population active 1991** est un pivot de l'approche de Statistique Canada qui vise à satisfaire les besoins de ses clients en matière d'information.

**Moyennes annuelles de la population active 1991** (numéro 71-220 au catalogue) : est offert à 39 \$ au Canada, 47 \$ US aux États-Unis et 55 \$ US dans les autres pays.

Pour commander, prière d'écrire à l'adresse suivante : Vente des publications, Statistique Canada, Ottawa (Ontario) K1A 0T6, ou communiquer avec le centre régional de consultation de Statistique Canada le plus proche (liste des centres incluse dans la présente publication).

Pour accélérer le service, commander par télécopieur au 1-613-951-1584, ou composer sans frais le 1-800-267-6677 et utiliser la carte VISA ou MasterCard.

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,  
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607)  
or to the Statistics Canada reference centre in:

## Highlights

### Industrial Product Price Index (IPPI)

According to preliminary figures, the Industrial Product Price Index (IPPI, 1986 = 100) increased 0.8% to 108.2 in February 1992 from January's revised level of 107.3. This is the largest increase since September 1990, and it follows a 0.1% increase in January 1992. Sixteen out of the 21 major groups of products registered increases in their indexes while three decreased and two remained unchanged. While price increases were widespread, the largest single influence in February was the 2.6% increase in the value of the U.S. dollar against its Canadian counterpart and its impact on prices of exports that are denominated in U.S. currency; the indexes most affected were those for autos, trucks and other transport equipment (1.7%), paper and paper products (1.2%) and lumber, sawmill and other wood products (4.1%). Other significant price increases were registered in indexes for primary metal products (2.6%) and meat, fish and dairy products (1.3%). With a decline of 1.3% this month, the petroleum and coal products index registered the only significant decrease; indexes for beverages and tobacco and tobacco products both edged down 0.1%.

In February 1992, the IPPI was 2.2% lower than a year ago. This is up from the previous months; the year-to-year change had declined throughout 1991 until December where it stood at -3.4%, a level which was maintained in January 1992. The main indexes which declined over the last twelve months were for petroleum and coal products (-20.9%), primary metal products (-7.0%), paper and paper products (-10.8%) and chemical and chemical products (-4.2%). Of the indexes showing positive year-to-year change, autos, trucks and other transport equipment (3.7%) and lumber, sawmill and other wood products (8.5%) had the largest effect on the overall movement. Although the year-to-year change for first stage intermediate goods was still -9.5% in February, it has taken an upward direction since October 1991 when it reached a low of -15.3%. This mainly reflects similar patterns for the indexes for primary metals and paper and paper products. The 12-month change for finished goods generally decreased throughout 1991; the 0.5% positive change in February 1992 contrasts with the -0.3% annual change registered in January. The 12-month change for the index excluding petroleum and coal products was -0.7% in February.

The lumber, sawmill and other wood products index showed an increase of 4.1% in February due primarily to higher prices for all major products: softwood lumber and ties (6.8%), softwood veneer and plywood (11.5%) and particle board and waferboard (12.8%). Prices rose in all markets. Over the last twelve months, increases for softwood lumber and ties products (20.2%) were primarily responsible for the 8.5% increase in the lumber, sawmill and other wood products index.

The primary metal products index increased by 2.6% in February. All components registered increases. The major contributors to the monthly change were indexes for aluminum products (5.2%), copper ingots, refinery shapes (8.7%) and nickel ingots, refinery shapes (10.1%). Over the last twelve months, the primary metal products index has fallen 7.0% with declines ranging from 13.3% for aluminum products to 2.7% for other non-ferrous metal products.

The paper and paper products index increased by 1.2% mainly as a result of higher prices for sulphate woodpulp (3.8%) as well as for newsprint and other paper for printing (1.3%). Higher prices were registered on both domestic and export markets. On a year-to-year basis, the paper and paper products index was lower by 10.8% mainly as a result of lower prices for pulp (-19.9%) and newsprint and other paper stock (-10.6%).

The meat, fish and dairy products index increased by 1.3% in February. Higher prices were registered for fresh or frozen pork (4.6%), fresh or frozen beef and veal (3.5%) and dairy products (0.9%). Over the last twelve months, the meat, fish and dairy products index has declined 1.7% mainly as a result of decreases in prices for pork (-15.9%) and beef and veal (-4.5%).

According to initial estimates, the petroleum and coal products index fell 1.3% in February due to lower prices for gasoline and fuel oil as well as for other refined petroleum products. On a year-to-year basis, the petroleum and coal products index declined 20.9% due primarily to lower prices for gasoline and fuel oil.

## Faits saillants

### Indice des prix des produits industriels (IPPI)

D'après les chiffres préliminaires, l'indice des prix des produits industriels (IPPI, 1986 = 100) se situait à 108.2 en février 1992, en hausse de 0.8% par rapport au niveau révisé de 107.3 pour janvier 1992. Ceci est la plus grosse augmentation mensuelle depuis septembre 1990 et suit une hausse de 0.1% en janvier 1992. Seize des 21 principaux groupes des produits ont augmenté alors que trois ont diminué et deux sont demeurés inchangés. Alors que les augmentations de prix étaient répandues parmi les groupes de produits, l'impact le plus important en février venait du gain de 2.6% du dollar américain face au dollar canadien, et son effet à la hausse sur les prix à l'exportation, cotés en dollar américain; les indices principalement affectés ont été les autos, camions et autre matériel de transport (1.7%), le papier et produits connexes (1.2%) et les sciages, produits de scierie et divers (4.1%). D'autres augmentations importantes ont été enregistrées dans les indices des produits métalliques primaires (2.6%) et de la viande, poisson et produits laitiers (1.3%). Avec une baisse de 1.3%, l'indice des produits du pétrole et du charbon a enregistré la diminution la plus importante ce mois-ci; les indices pour les boissons et le tabac et produits du tabac ont tous les deux diminué de 0.1%.

En février 1992, l'IPPI était 2.2% plus bas que l'année dernière. Ceci représente une hausse comparativement aux mois précédents; le taux de changement annuel avait diminué en 1991 jusqu'en décembre où il se situait à -3.4%, un niveau qui s'est maintenu en janvier 1992. Les principaux indices derrière la baisse annuelle ont été les produits métalliques primaires (-7.0%), le papier et produits connexes (-10.8%), les produits du pétrole et du charbon (-20.9%) et les produits chimiques (-4.2%). Parmi les indices qui ont enregistré une augmentation annuelle, ceux qui ont eu le plus d'effet sur le changement annuel ont été les autos, camions et autre matériel de transport (3.7%) et les sciages, produits de scierie et divers (8.5%). Bien que le taux de changement annuel pour les produits semi-finis de première transformation était -9.5% en février, il démontre une tendance à la hausse depuis octobre 1991 où il avait atteint -15.3%. Cette tendance reflète les mêmes patrons observés pour les indices des produits métalliques primaires et du papier et produits connexes. Le taux de changement annuel pour les produits finis a, en général, diminué durant l'année 1991; l'augmentation positive de 0.5% en février 1992 contraste avec le taux de -0.3% enregistré en janvier. La variation sur douze mois, sans les produits du pétrole et du charbon, a été de -0.7% en février.

L'indice des sciages, produits de scierie et divers a connu une hausse de 4.1% en février 1992, en raison principalement de l'effet de la hausse de prix affichée par les produits importants: bois de construction, de résineux (6.8%), placage et contreplaqué, de résineux (11.5%) et panneaux de particules (12.8%). Les prix ont augmenté tant sur le marché domestique que sur celui à l'exportation. Au cours des douze derniers mois, l'augmentation dans les prix du bois de construction, de résineux (20.2%) a été le principal facteur du changement dans le taux annuel de variation pour l'indice des sciages, produits de scierie et divers (8.5%).

L'indice des produits métalliques primaires a augmenté de 2.6% en février. Toutes les composantes ont enregistré des augmentations. Les hausses les plus importantes furent enregistrées dans les indices des produits d'aluminium (5.2%), les profilés d'affinage de cuivre (8.7%) et les profilés d'affinage de nickel (10.1%). Au cours des douze derniers mois, l'indice des produits métalliques primaires a chuté de 7.0%, avec des baisses allant de 13.3% pour les produits d'aluminium à 2.7% pour les autres produits de métaux non ferreux.

L'indice des prix du papier et produits connexes a augmenté de 1.2% en février, reflétant des prix plus élevés pour la pâte de bois au sulfate (3.8%) et le papier journal et autres papiers d'impression (1.3%). Les prix ont augmenté tant sur le marché domestique que sur celui à l'exportation. Au cours des douze derniers mois, l'indice du papier et produits connexes a chuté de 10.8% en raison de la baisse de 19.9% dans les prix des pâtes de bois et celle de 10.6% pour le papier journal et autres pâtes travaillées.

L'indice de la viande, poisson et produits laitiers a augmenté de 1.3% en février, en raison principalement d'une hausse dans les prix du porc, frais ou congelé (4.6%), du boeuf et veau, frais ou congelé (3.5%) et des produits laitiers (0.9%). Au cours des douze derniers mois, l'indice de la viande, poisson et produits laitiers a chuté de 1.7%, principalement à cause des baisses dans les prix du porc (-15.9%) et du boeuf et veau (-4.5%).

D'après les chiffres préliminaires, l'indice des produits du pétrole et du charbon a diminué de 1.3% en février, reflétant des prix plus bas pour l'essence et le mazout ainsi que pour les autres produits raffinés du pétrole. Au cours des douze derniers mois, l'indice du pétrole et du charbon a chuté de 20.9% en raison principalement d'une baisse dans les prix de l'essence et du mazout.

## Highlights

### Raw Materials Price Index

Preliminary estimates for the Raw Materials Price Index (RMPI, 1986 = 100) showed a 1.7% increase to 100.8 in February. The 3.4% increase in the animal and animal products index and the 5.7% raise in the non-ferrous metals were the most important contributors to the total increase. However, a 1.3% drop in the mineral fuels index moderated the overall increase. The RMPI excluding mineral fuels increased by 3.2% in February.

In February 1992, the RMPI was down 9.1% from February 1991. The decrease was due to lower levels for six of the seven components of the total index. The main changes were a 20.8% drop in mineral fuels prices and a 8.8% decrease in the non-ferrous metals index. The RMPI excluding the mineral fuels was down 2.8% in February 1992 compared to February 1991.

The animal and animal products index was up 3.4% in February. This increase was largely the result of higher prices for hogs (13.6%) and cattle for slaughter (5.7%). The animal and animal products index was down 4.1% from the same period last year, due primarily to a 20.5% drop in hog prices and a 6.9% decrease in the prices of cattle for slaughter. However, the prices of fish were up 7.6% in February 1992 compared to the same period last year.

The non-ferrous metals index was up 5.7% from January 1991. The main increases were a 8.2% jump in the prices of copper concentrates and a 10.2% rise in the prices of aluminum materials. However, the non-ferrous metals index was still 8.8% lower than a year ago. The main contributions to this came from lower prices for aluminum materials (-17.2%), concentrates of copper (-6.5%) and radio-active concentrates (-20.6%).

The wood price index rose 2.3% in February mainly because prices of logs and bolts were up 3.8%. However the prices of softwood pulpwood fell by 1.3%. On a year-to-year basis, the wood price index was up 3.2%, because of the 4.7% increase in the prices of logs and bolts and despite a 1.1% decline in the prices of softwood pulpwood.

The mineral fuels price index fell by 1.3% in February as a result of lower prices for crude mineral oils (-1.6%). Natural gas prices were also down, 0.9%. The mineral fuels index was down 20.8% from February 1991, due primarily to a 22.3% drop in the prices of crude mineral oils.

## Faits saillants

### Indices des prix des matières brutes

D'après les chiffres préliminaires, l'indice des prix des matières brutes (IPMB, 1986=100) était en hausse de 1.7% à 100.8 en février. Les augmentations de 3.4% de l'indice des animaux et substances animales et de 5.7% des prix des métaux non ferreux ont été les plus significatives. Cependant, la baisse de 1.3% des prix des combustibles minéraux a modéré la hausse globale. L'IPMB sans la composante des combustibles minéraux était en hausse de 3.2% par rapport au mois dernier.

En février 1992, l'IPMB était inférieur de 9.1% par rapport à février 1991. Cette diminution a été le résultat de baisses dans six des sept composantes de l'indice total. Parmi celles-ci, notons la chute de 20.8% des prix des combustibles minéraux et celle de 8.8% de l'indice des métaux non ferreux. L'IPMB sans la composante des combustibles minéraux a diminué de 2.8% entre février 1991 et février 1992.

L'indice des animaux et substances animales a augmenté de 3.4% en février. Cette augmentation fut le résultat de la hausse de 13.6% des prix du porc et de 5.7% des prix des bovins envoyés à l'abattage. Par rapport à la même période l'an dernier, l'indice des animaux et substances animales a régressé de 4.1%, principalement à cause des baisses de 20.5% des prix du porc et de 6.9% des prix des bovins envoyés à l'abattage. Par contre, les prix du poisson étaient 7.6% plus élevés en février 1992 qu'en février 1991.

L'indice des métaux non ferreux a augmenté de 5.7% par rapport au mois précédent. Les augmentations les plus significatives ont été observées pour les concentrés de cuivre (8.2%) et pour les prix des matériaux d'aluminium (10.2%). Au cours de la dernière année, l'indice des métaux non ferreux a diminué de 8.8%. Cette baisse fut surtout le résultat de la chute de 17.2% des prix des matériaux d'aluminium, de 6.5% des prix des concentrés de cuivre et de 20.6% des prix des concentrés radio-actifs.

L'indice des prix du bois a augmenté de 2.3% en février surtout parce que les prix des billes et billots ont monté de 3.8%. Cependant, les prix du bois à pâte de résineux ont fléchi de 1.3%. Comparé à la même période l'an dernier, l'indice des prix du bois a augmenté de 3.2% suite à l'augmentation de 4.7% des prix des billes et billots et malgré la baisse de 1.1% des prix du bois à pâte de résineux.

L'indice des prix des combustibles minéraux a diminué de 1.3% en février suite à la baisse de 1.6% des prix des huiles minérales brutes. L'indice des prix du gaz naturel étaient aussi en baisse en février, de 0.9%. Par rapport à l'an dernier, l'indice des combustibles minéraux a diminué de 20.8% surtout à cause de la chute de 22.3% des prix des huiles minérales brutes.

	Mineral fuels - Combustibles minéraux	95.0	96.3	-1.3	-13.6	-20.8

(1) Revised.

(1) Révisé.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations  
TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations de produits

1986 = 100

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where

ss indicates the S-level commodity code (from 9 to 28)

mm indicates the M-level commodity code (from 14 to 43, 45 to 69)

nn indicates either a split of the M-level commodity,

or 91, which indicates a special aggregation

or 99, which indicates special details.

pppp indicates the PCG code (except for some special aggregations which include several PCGs).

rr indicates a split of a PCG.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate.

For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling.

The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:

ss indique le code du niveau S des produits (de 9 à 28)

mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)

nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.

pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)

rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

D 694164	39 3991,92,99	25%		1992	117.8	117.9											

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

## EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

### Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the *Daily Bulletin* release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

### Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

## EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

### Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le *Quotidien* (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indice des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

### Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabilistes, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

### Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

### Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where  $w^i$  are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period o and time t for the defined aggregate;

$w^i$  is the transaction value of the element i in the base period;

$P_{t/o}^i$  is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$  indicates summation over all elements i in the defined aggregate.

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

### Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

### Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle  $w^i$  sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$  dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

$w^i$  est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$  est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

$\sum_i$  signifie la sommation de tous les éléments i dans l'agrégat défini.

## Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

## Reference Documents

62-558 Industry Price Indexes, 1986 = 100: users' guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

## Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

## Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: guide aux utilisateurs, \$40.00.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, \$25.00.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

## RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

## INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w_i}{\sum w_i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period o and time t for the defined aggregate;

$w_i$  is the transaction value of the element i in 1986;

$P_{t/o}^i$  is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$  indicates summation over all elements i in the defined aggregate.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$  dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

$w_i$  est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$  est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à a période courante t;

$\sum_i$  indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

L'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

## **ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100**

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

## **INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100**

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986=100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

# JOIN THE *Celebration*

WITH THE MOST USEFUL  
AND ATTRACTIVE  
**CANADA YEAR BOOK**  
EVER PUBLISHED.

On the occasion of the nation's 125th anniversary of Confederation, the **1992 Canada Year Book** takes a unique look at the fascinating highlights in the development of Canada since 1867.

Exceptionally popular among business people, journalists, librarians, parliamentarians, educators and diplomats for 125 years, the **1992 Canada Year Book** is designed as a comprehensive reference source for the latest on economic, political, and social information on Canada and Canadians. And for the first time, this "special collector's" edition presents picturesque vignettes on Canada's past with informative, easy-to-read text.

Special features include:

- a new 22cm X 30cm (9" X 12") format
- larger typeface
- over 300 rare archival photos
- historical perspectives on Canada's past
- 22 chapters, 607 pages bound in deluxe hard cover

Time and time again, you'll reach for this compact encyclopedia to answer questions on all aspects of Canada.

- THE LAND
- THE PEOPLE
- THE NATION
- THE ECONOMY
- ARTS AND LEISURE

Available in separate English and French editions, the **Canada Year Book** (Cat. No. 11-402E) sells for \$49.95 (plus \$5.05 shipping and handling) in Canada, US \$60 in the United States, and US\$70 in other countries (includes shipping and handling).

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

For faster ordering, using your VISA or MasterCard, call toll-free 1-800-267-6677 or fax your order to (613) 951-1584. Please do not send confirmation.

# PARTICIPEZ *à la fête*

EN VOUS PROCURANT  
**L'ANNUAIRE DU CANADA**  
LE PLUS UTILE ET LE PLUS  
ATTRAYANT JAMAIS PUBLIÉ.

L'Annuaire du Canada de 1992, qui marque le 125<sup>e</sup> anniversaire de la Confédération, jette un regard unique sur les grands moments de l'évolution du pays depuis 1867.

Cet ouvrage, particulièrement populaire depuis 125 ans auprès des gens d'affaires, des journalistes, des bibliothécaires, des parlementaires, des enseignants et des diplomates, est conçu comme un ouvrage de référence où l'on retrouve les données économiques, politiques et sociales les plus récentes sur le Canada et les Canadiens. Cette édition spéciale présente, pour la première fois, de pittoresques illustrations se rapportant à l'histoire du Canada de même que des textes informatifs et faciles à lire.

Au nombre des caractéristiques spéciales, on compte :

- un nouveau mode de présentation : 22cm x 30 cm (9" x 12")
- des caractères plus gros
- plus de 300 photos d'archives rares
- des perspectives historiques sur le passé du Canada
- 22 chapitres, 607 pages reliées par une couverture rigide de luxe.

Cette encyclopédie compacte est un ouvrage indispensable pour répondre à vos questions portant sur tous les aspects du Canada.

- LE TERRITOIRE
- LA POPULATION
- LA NATION
- L'ÉCONOMIE
- LES ARTS ET LES LOISIRS

Vous pouvez vous procurer l'**Annuaire du Canada** (no 11-402F au Catalogue), en version française ou anglaise, pour 49,95 \$ (plus 5,05 \$ pour frais d'expédition et de manutention) au Canada, 60 \$ (devises américaines) aux États-Unis et 70 \$ (devises américaines) dans les autres pays (frais d'expédition et de manutention compris).

Pour commander, prière d'écrire au Service des Ventes des publications de Statistique Canada, Ottawa (Ontario) K1A 0T6, ou de communiquer avec le Centre régional de consultation de Statistique Canada le plus près de chez vous (voir la liste qui figure dans la publication).

## Don't start your week without it

Get a jump on your work week by making sure you have the most current economic and social information in Canada. Travelling by first class mail or courier, Statistics Canada's digest, Infomat, arrives at the beginning of each week to help you monitor key economic indicators and keep up with the most current data releases from Canada's national statistical agency.

In eight fact-filled pages, Infomat highlights the findings of Statistics Canada surveys and brings them to your desk each week, often long before detailed reports are published. Throughout the year you'll get the first results of over 100 ongoing surveys and many special surveys—from manufacturing shipments to the health of Canadians or post graduate employment to part-time workers.

### Each week, Infomat presents you with,

- concise summaries of fresh facts from over 100 ongoing surveys
- charts and graphs that let you instantly scan the trends
- Overview - an outline of the subjects covered in each issue that you can scan in 30 seconds
- guidance on how to obtain special reports to assist you in your more detailed research.
- Current Trends and Latest Monthly Statistics sections that bring you up to date on the Consumer Price Index, Gross Domestic Product and 21 other key monthly series

Managers, analysts and researchers who are responsible for keeping up to date on changes in Canada's economic and social climate can count on Infomat — as a quick overview of the latest trends and as a weekly reminder of key indicators and data releases. Many subscribers use Infomat's highlights to add authority to their industry analyses, investment plans or corporate reports.

To order Infomat (11-002E), 50 issues annually for \$125 in Canada, US\$150 in the U.S. and US\$175 in other countries, write to Publications Sales and Service, Statistics Canada, Ottawa, Canada, K1A 0T6. For faster service, use your VISA or MasterCard and call toll-free in Canada, 1-800-267-6677.

## votre première lecture de la semaine

Commencez votre semaine de travail en vous assurant que vous avez sous la main les dernières informations économiques et sociales au Canada. Voyageant en courrier de première classe ou par messagerie, Infomat, le condensé de Statistique Canada, arrive au début de chaque semaine pour vous aider à suivre les principaux indicateurs économiques et vous tenir au courant des dernières données publiées par l'organisme national d'enquêtes du pays.

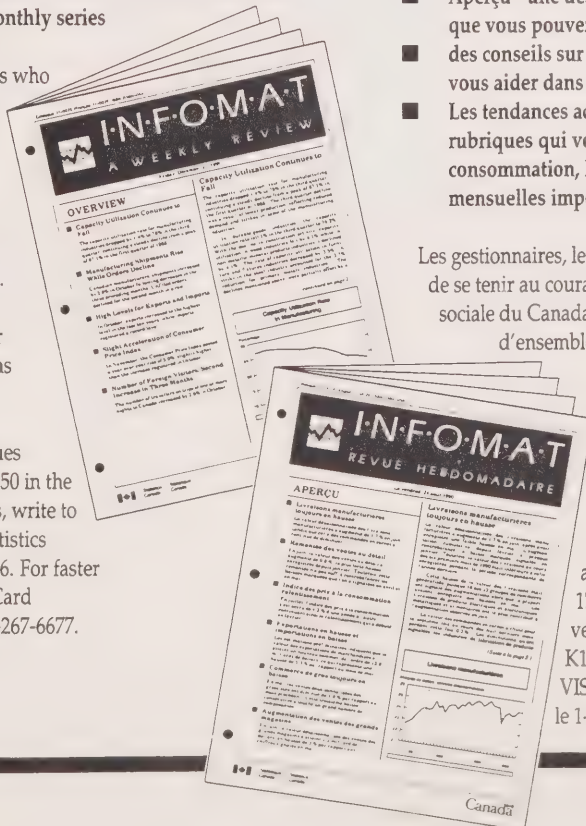

En huit pages remplies de données, Infomat présente les faits saillants des enquêtes de Statistique Canada et les dépose sur votre bureau chaque semaine, bien avant que des rapports détaillés ne soient publiés. Tout au long de l'année, vous avez les premiers résultats de plus de 100 enquêtes permanentes et de nombreuses enquêtes spécialisées, qui vont des expéditions des fabricants à la santé des Canadiens ou de l'emploi des diplômés universitaires aux travailleurs à temps partiel.

### Chaque semaine, Infomat vous offre :

- des résumés de faits tout récents provenant de plus de 100 enquêtes différentes
- des diagrammes et des graphiques qui vous donnent immédiatement les tendances
- Aperçu - une description des sujets traités dans chaque numéro, que vous pouvez parcourir en 30 secondes
- des conseils sur la façon d'obtenir des rapports spéciaux pour vous aider dans vos recherches plus poussées
- Les tendances actuelles et Dernières statistiques mensuelles, rubriques qui vous tiennent à jour sur l'indice des prix à la consommation, le produit intérieur brut et 21 autres séries mensuelles importantes.

Les gestionnaires, les analystes et les chercheurs qui ont la responsabilité de se tenir au courant de l'évolution de la conjoncture économique et sociale du Canada peuvent compter sur Infomat pour avoir une vue d'ensemble des dernières tendances et disposer ainsi d'un aide-mémoire hebdomadaire des principaux indicateurs et données publiés. Plusieurs abonnés utilisent les faits saillants d'Infomat pour relever l'autorité de leurs analyses industrielles, projets d'investissements ou rapports financiers.

Pour commander Infomat (11-002F), 50 numéros par an pour 125 \$ au Canada, 150 \$ US aux États-Unis et 175 \$ US dans les autres pays, écrivez à Publications, vente et service, Statistique Canada, Ottawa, Canada K1A 0T6. Pour un service plus rapide, utilisez votre carte VISA ou MasterCard et composez sans frais au Canada le 1-800-267-6677.

# Your guide to understanding Canada's economy

**The structure of Canada's economy can seem difficult to understand. What do we produce? How do we produce it? Who buys it, and who sells it? Statistics Canada's new publication, the GUIDE TO THE INCOME AND EXPENDITURE ACCOUNTS, addresses these puzzling issues and explains how the Income and Expenditure Accounts (IEA) will enrich your understanding of our economic system.**

At the centre of macroeconomic analysis and policy-making in Canada, the IEA show how various groups like households, businesses and governments raise revenue and expend it to purchase goods and services. Together the IEA afford an opportunity to assess the performance of the national and provincial economies.

Developed for both economic specialists and general users, the *Guide* is the first in a series that will fully document Canada's system of national and provincial accounts. In four concise chapters, the *Guide* examines a comprehensive range of topics, including:

- Who uses the IEA and for what purposes
- The role of the IEA within Canada's System of National Accounts (SNA)
- The impact of the Historical Revision of 1986
- Why GDP, rather than GNP, is the central aggregate of the system
- The significance of the Sector Accounts to understanding how a modern economy functions
- The importance of Constant Price Estimates to both the IEA and the SNA
- How the GDP estimates are calculated
- How the quality and reliability of the IEA estimates are assessed

The *Guide* also presents dozens of tables to clearly illustrate theoretical examples and to help you fully understand technical aspects of the IEA.

For business strategists, students, economic analysts and current users of SNA data, the *Guide* is a must. Order the *Guide to the Income and Expenditure Accounts* (Cat.# 13-603E, No.1) for only \$35 in Canada, US\$42 in the United States and US\$49 in other countries. Call toll-free 1-800-267-6677 and use your Visa or MasterCard, fax your order to 1-613-951-1584, or write to:  
Publication Sales, Statistics Canada,  
Ottawa, Ontario K1A 0T6

**La structure de l'économie canadienne peut sembler difficile à comprendre. Que produisons-nous? Comment produisons-nous? Qui achète notre production et qui la vend? La nouvelle publication de Statistique Canada, GUIDE DES COMPTES DES REVENUS ET DÉPENSES, répond à ces questions difficiles et explique comment les comptes des revenus et dépenses (CRD) vous aideront à mieux comprendre notre système économique.**

Les CRD se trouvent au coeur de l'analyse macroéconomique et des prises de décisions au Canada et montrent comment différents groupes, tels que les ménages, les entreprises et les administrations, se procurent leurs recettes et les dépensent en biens et en services. Ils permettent ainsi d'évaluer les résultats des économies nationale et provinciales.

Destiné aux spécialistes de l'économie comme au grand public, ce *Guide* est le premier ouvrage d'une série qui traite à fond du système de comptabilité nationale du Canada et des provinces. En quatre chapitres concis, le *Guide* aborde un éventail complet de sujets, dont :

- L'identification des personnes qui utilisent les CRD et dans quels buts
  - Le rôle des CRD dans le système de comptabilité nationale du Canada (SCN)
  - L'incidence de la révision historique de 1986
  - Le remplacement du PNB par le PIB
  - L'importance des comptes sectoriels pour comprendre le fonctionnement d'une économie moderne
  - L'importance des estimations en prix constants pour les CRD et le SCN
  - Le calcul des estimations du PIB
  - L'évaluation de la qualité et de la fiabilité des estimations des CRD
- Le *Guide* contient également des dizaines de tableaux afin d'illustrer clairement des exemples théoriques et de vous aider à comprendre parfaitement les aspects techniques des CRD.

Pour les stratèges des entreprises, les étudiants, les analystes de l'économie et les utilisateurs actuels des données du SCN, le *Guide* est une lecture qui s'impose. Commandez le *Guide des comptes des revenus et dépenses* (N° 13-603F, N°1 au catalogue) pour 35 \$ seulement au Canada, 42 \$ US aux États-Unis et 49 \$ US dans les autres pays. Composez sans frais le 1-800-267-6677 et utilisez votre carte VISA ou MasterCard, télécopiez votre commande au 1-613-951-1584, ou écrivez à :

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,  
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607)  
or to the Statistics Canada reference centre in:

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressées à:

Section des industries de biens et de services,  
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

## Industrial Product Price Index

According to preliminary figures, the Industrial Product Price Index (IPPI, 1986 = 100) showed, in March, a second consecutive monthly increase to 108.3, up 0.3% from February's revised level of 108.0. Eleven of the 21 major groups of products registered increases in their indexes while six decreased and four remained unchanged. The total index excluding petroleum and coal products was up 0.3%.

The 1.0% increase, in March, in the value of the U.S. dollar against the Canadian dollar influenced indexes which included export prices denominated in U.S. currency. Mainly affected were indexes for autos, trucks and other transport equipment which increased 0.6% and lumber, sawmill and other wood products which went up 1.2%. Other notable increases were registered in indexes for primary metal products (0.7%) and meat, fish and dairy products (0.4%).

In March 1992, the IPPI was 1.4% lower than a year ago. The 12 month movement went up for the second month in a row from its rate of -3.5% in January. The main contributors to the annual change were indexes for petroleum and coal products (-17.7%), paper and paper products (-10.0%) and the primary metal products (-6.2%). The year-to-year decrease was partially offset by increases in the autos, trucks and other transport equipment index (4.3%) and the lumber, sawmill and other wood products index (10.0%). The twelve month change for the index excluding petroleum and coal products was -0.4% in March.

The finished goods and the intermediate goods price indexes each increased 0.3% in March compared to February. On a year-to-year basis, the intermediate goods index went down 2.9% due mainly to the 8.0% decrease for first-stage intermediate goods. Over the last twelve months, the finished goods index was 1.0% higher as the capital equipment index rose by 3.0%.

The autos, trucks and other transportation equipment index rose 0.6% in March. This change was mainly due to the 0.9% increase in the passenger automobiles index where prices went up in both the domestic and export market by 0.3% and 1.1% respectively. Compared to last year, the autos, trucks and other transportation equipment index increased by 4.3% mainly as a result of higher prices for passenger automobiles (6.7%). Domestic prices went up 1.1% and export prices rose 8.0% from a year earlier.

The lumber, sawmill and other wood products index showed an increase of 1.2% in March due primarily to higher prices for softwood lumber and ties (2.7%) and softwood veneer and plywood (3.2%). Prices for softwood lumber and ties rose 2.6% on the domestic market and 2.5% for exports. Over the last 12 months, increases for softwood lumber and ties products (22.9%) were primarily responsible for the 10.0% increase in the lumber, sawmill and other wood products index.

The primary metal products index increased by 0.7% in March mainly due to a 4.7% increase in prices for aluminum products. This increase was partially offset by lower prices for nickel products which declined 6.7%. Compared to last year, the primary metal products index has fallen 6.2% mainly as a result of lower prices for iron and steel products and aluminum products which were down by 6.2% and 8.9% respectively.

The meat, fish and dairy products index increased by 0.4% in March as higher prices were registered for fresh or frozen beef and veal (0.8%), fresh or frozen turkeys (3.4%) and primary fish products (0.5%). On a year-to-year basis, the meat, fish and dairy products index has declined 1.1% due mainly to decreases in prices for pork (-12.2%) and beef and veal (-3.6%). Prices for dairy products were up by 3.9% from a year earlier.

# Faits saillants

## Indice des prix des produits industriels

D'après les chiffres préliminaires, l'indice des prix des produits industriels (IPPI, 1986 = 100) a enregistré en mars 1992, une deuxième augmentation mensuelle en autant de mois à 108,3, en hausse de 0,3% par rapport au niveau révisé de 108,0 observé en février 1992. Onze des 21 principaux groupes des produits ont augmenté alors que six ont diminué et quatre sont demeurés inchangés. La variation mensuelle de l'indice total excluant les produits du pétrole et du charbon a été de +0,3%.

D'autre part, l'augmentation de 1,0% du dollars américain face à la devise canadienne a poussé à la hausse les indices qui incluent des prix à l'exportation cotés en dollar américain. Les indices principalement affectés ont été les autos, camions et autre matériel de transport qui ont augmenté de 0,6% et les sciages, produits de scierie et divers qui ont augmenté de 1,2%. D'autres augmentations importantes ont été enregistrées dans les indices des produits métalliques primaires (0,7%) et des viandes, poissons et produits laitiers (0,4%).

En mars 1992, l'IPPI était 1,4% plus bas qu'en mars 1991. Ainsi, l'amplitude des changements annuels diminue pour un second mois de suite alors que l'on avait -3,5% en janvier. Les principaux indices derrière la baisse annuelle ont été les produits du pétrole et du charbon (-17,7%), le papier et produits connexes (-10,0%) et les produits métalliques primaires (-6,2%). Ces baisses ont été modérées par la hausse de 4,3% des prix des autos, camions et autre matériel de transport et par celle de 10,0% des prix des sciages, produits de scierie et divers. La variation sur douze mois, sans les produits du pétrole et du charbon, a été de -0,4% en mars.

L'indice des produits finis et celui des produits semi-finis ont augmenté de 0,3% en mars par rapport à février. Comparé à mars 1991, l'indice des produits semi-finis a baissé de -2,9% en raison d'une diminution de 8,0% dans l'indice des prix des produits semi-finis de première étape. D'autre part, l'indice des produits finis était 1,0% plus élevé en mars comparé à l'an dernier en raison d'une hausse de 3,0% dans l'indice du matériel capitalisé.

L'indice des voitures, camions et matériel de transport a augmenté de 0,6% entre février et mars 1992. Cette variation fut surtout causé par la hausse de 0,9% du prix des automobiles. Les prix sur le marché domestique ont augmenté de 0,3% et ceux à l'exportation de 1,1%. Par rapport à l'an dernier, l'indice des voitures, camions et matériel de transport a augmenté de 4,3% en raison principalement d'une hausse de 6,7% dans le prix des automobiles. Les prix des automobiles sur le marché domestique ont augmenté de 1,1% alors que ceux à l'exportation ont monté de 8,0%.

L'indice des sciages, produits de scierie et divers a connu une hausse de 1,2% en mars, en raison principalement de l'augmentation de 2,7% des prix du bois de construction de résineux et de celle de 3,2% des placages et contreplaqués de résineux. Les prix du bois de construction de résineux ont augmenté de 2,6% sur le marché domestique et de 2,5% sur celui à l'exportation. Au cours des douze derniers mois, l'augmentation de 22,9% des prix du bois de construction de résineux a été la principale cause de l'augmentation de 10,0% pour l'indice des sciages, produits de scierie et divers.

L'indice des produits métalliques primaires a augmenté de 0,7% en mars, reflétant des prix plus élevés pour les produits d'aluminium (4,7%). Cette augmentation a été partiellement contrebalancée par la baisse de 6,7% pour l'indice des produits de nickel. Par rapport à mars 1991, l'indice des produits métalliques primaires a chuté de 6,2% avec des baisses de 6,2% pour l'indice des produits du fer et de l'acier et de 8,9% pour l'indice des produits d'aluminium.

L'indice de la viande, poisson et produits laitiers a augmenté de 0,4% en mars, en raison principalement d'une hausse de 0,8% dans les prix du boeuf et veau, frais ou congelé, de 3,4% des prix des dindons frais ou congelés et de 0,5% des prix des produits primaires du poisson. Au cours des douze derniers mois, l'indice de la viande, poisson et produits laitiers a chuté de 1,1%, surtout à cause des baisses de 12,2% dans les prix du porc frais ou congelé et de 3,6% des prix du boeuf et veau frais ou congelés. Par contre, l'indice des prix des produits laitiers a augmenté de 3,9% par rapport à mars 1991.

## Highlights

### Raw Materials Price Index

Preliminary estimates for the Raw Materials Price Index (RMPI, 1986=100) showed a 1.0% increase to 101.8 in March. The main contributors to this increase were indexes for mineral fuels (2.0%), wood (1.4%) and vegetable products (1.2%). These increases were partially offset by lower prices in the animal and animal products index (-0.4%). The RMPI excluding mineral fuels increased by 0.6% in March.

In March 1992, the RMPI was down 4.2% from March 1991. The decrease was due to lower levels for four of the seven components of the total index. The main changes were a 8.8% drop in mineral fuels prices, a 7.6% decrease in the non-ferrous metals index and a 3.8% decline in the animal and animal products index. The RMPI excluding mineral fuels was down 2.0% in March 1992 compared to March 1991. However, since December 1991 this index is up 4.4% as almost all components have risen by a comparable amount.

The mineral fuels price index rose by 2.0% in March as a result of higher prices for crude mineral oils (2.1%). The mineral fuels index was down 8.8% from March 1991, due primarily to a 9.8% drop in the prices of crude mineral oils.

The wood price index rose 1.4% in March mainly because of higher prices for logs and bolts (1.2%) and softwood pulpwood (2.1%). On a year-to-year basis, the wood price index was up 4.1%, as a result of the 5.7% increase in the prices of logs and bolts.

The non-ferrous metals index was up 0.5% from February 1992. This increase was a result of a 4.5% jump in the prices of aluminum materials as well as a 2.5% rise in the prices of zinc concentrates. However, the non-ferrous metals index was still 7.6% lower than a year ago. The main contributions to this decline came from lower prices for aluminum materials (-13.3%), concentrates of copper (-4.2%) and radio-active concentrates (-16.3%).

The animal and animal products index was down 0.4% in March. A decrease in prices for hogs (-5.5%) was partially offset by an increase in prices for cattle for slaughter (1.9%). The animal and animal products index was down 3.8% from the same period last year, due primarily to a 22.4% drop in hog prices and a 6.2% decrease in the prices of cattle for slaughter. Prices for fresh fish and unprocessed milk were up 7.2% and 1.8% respectively from a year earlier.

## Faits saillants

### Indices des prix des matières brutes

D'après les chiffres préliminaires, l'indice des prix des matières brutes (IPMB, 1986=100) était en hausse de 1.0% à 101.8 en mars. Les principaux indices derrière cette hausse ont été les combustibles minéraux (2.0%), le bois (1.4%) et les substances végétales (1.2%). Ces augmentations ont été partiellement contrebalancées par une diminution dans les prix des animaux et des substances animales (-0.4%). L'IPMB sans la composante des combustibles minéraux était en hausse de 0.6% par rapport au mois dernier.

En mars 1992, l'IPMB était inférieur de 4.2% par rapport à mars 1991. Cette diminution a été le résultat de baisses dans quatre des sept composantes de l'indice total. Parmi celles-ci, notons les chutes de 8.8% des prix des combustibles minéraux, de 7.6% de l'indice des métaux non ferreux et de 3.8% de l'indice des animaux et substances animales. L'IPMB sans la composante des combustibles minéraux a diminué de 2.0% entre mars 1991 et mars 1992. Cependant, depuis décembre 1991 cet indice a augmenté de 4.4%; la plupart des composantes ont affiché un changement comparable.

L'indice des prix des combustibles minéraux a augmenté de 2.0% en mars suite à la hausse de 2.1% des prix des huiles minérales brutes. Par rapport à l'an dernier, l'indice des combustibles minéraux a diminué de 8.8% surtout à cause de la chute de 9.8% des prix des huiles minérales brutes.

L'indice des prix du bois a augmenté de 1.4% en mars surtout parce que les prix des billes et billots ont monté de 1.2% et ceux du bois à pâte de résineux de 2.1%. Comparé à la même période l'an dernier, l'indice des prix du bois a augmenté de 4.1% suite à l'augmentation de 5.7% des prix des billes et billots.

L'indice des métaux non ferreux a augmenté de 0.5% par rapport au mois précédent. Les augmentations les plus significatives ont été observées pour les concentrés de zinc (2.5%) et pour les prix des matériaux d'aluminium (4.5%). Au cours de la dernière année, l'indice des métaux non ferreux a diminué de 7.6%. Cette baisse fut surtout le résultat de la chute de 13.3% des prix des matériaux d'aluminium, de 4.2% des prix des concentrés de cuivre et de 16.3% des prix des concentrés radio-actifs.

L'indice des animaux et substances animales a diminué de 0.4% en mars. La baisse de 5.5% des prix du porc a été partiellement contrebalancée par une hausse de 1.9% des prix des bovins envoyés à l'abattage. Par rapport à la même période l'an dernier, l'indice des animaux et substances animales a régressé de 3.8%, principalement à cause des baisses de 22.4% des prix du porc et de 6.2% des prix des bovins envoyés à l'abattage. Par contre, les prix du poisson ont augmenté de 7.2% et ceux du lait non transformé de 1.8%.

	Mineral fuels - Combustibles minéraux	96.9	95.0	2.0	-2.5	-8.8

(1) Revised.

(1) Révisé.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations  
TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations de produits

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where

ss indicates the S-level commodity code (from 9 to 28)

mm indicates the M-level commodity code (from 14 to 43, 45 to 69)

nn indicates either a split of the M-level commodity,

or 91, which indicates a special aggregation

or 99, which indicates special details.

pppp indicates the PCG code (except for some special aggregations which include several PCGs).

rr indicates a split of a PCG.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate.

For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling.

The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:

ss indique le code du niveau S des produits (de 9 à 28)

mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)

nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.

pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)

rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

TABLE 3. Industrial Product Price Indexes, by Industry and Industry Groups(1)  
TABLEAU 3. Indices des prix des produits industriels, par industries et groupes d'industries(1)

1986 = 100

		Month - Mois												Annual average - Moyenne annuelle
		Jan. Janv.	Feb. Fév.	March Mars	April Avril	May Mai	June Juin	July Juill.	Aug. Août	Sept.	Oct.	Nov.	Dec. Dec.

				1992	117.8	117.9	118.0										

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

## EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

### Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the *Daily Bulletin* release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

### Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

## EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

### Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le *Quotidien* (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indice des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

### Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabilistes, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

## Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

## Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where  $w^i$  are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period o and time t for the defined aggregate;

$w^i$  is the transaction value of the element i in the base period;

$P_{t/o}^i$  is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$  indicates summation over all elements i in the defined aggregate.

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

## Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

## Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle  $w^i$  sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$  dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

$w^i$  est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$  est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

$\sum_i$  signifie la sommation de tous les éléments i dans l'agrégat défini.

## Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

## Reference Documents

62-558 Industry Price Indexes, 1986 = 100: users' guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

## Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

## Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: guide aux utilisateurs, \$40.00.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, \$25.00.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

## RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

## INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w_i}{\sum w_i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$  denotes the composite price index movement between the base period o and time t for the defined aggregate;

$w_i$  is the transaction value of the element i in 1986;

$P_{t/o}^i$  is the price index for element i, meaning its price change from the base period to time t;

$\sum_i$  indicates summation over all elements i in the defined aggregate.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$  dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

$w_i$  est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$  est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

$\sum_i$  indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

## Reference Document

See reference document in IPPI. Document contains the weighting pattern of the Raw Materials price Indexes (RMPI).

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

L'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

## Document de référence

Voir le document de référence de l'IPPI, qui contient le schéma de pondération des indices de prix des matières brutes (IPMB).

## **ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100**

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

## **INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100**

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986=100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

# CANADA'S ENVIRONMENT

# L'ENVIRONNEMENT DU CANADA

**E**very day you read news items about recycling, water pollution, industrial emissions or the depletion of the ozone layer. Unfortunately, these reports are often fragmented, making it difficult to get a complete picture of Canada's physical environment.

*Human Activity and the Environment* is written to help you understand the links between our population, socio-economic activities and our environment. You'll see, for example, how the purple loosestrife and zebra mussels are spreading throughout inland waters and the effect they have.

**CASE STUDY: A statistical profile of an Ontario river basin is also included as a case study to demonstrate how socio-economic information can be linked with physical data at a local level.**

**V**ous lisez tous les jours des articles traitant de recyclage, de la pollution de l'eau, des émissions de gaz industriels ou de la diminution de la couche d'ozone. Malheureusement, ces rapports sont trop souvent fragmentés et il devient difficile de se faire une parfaite idée de l'environnement physique du Canada.

*Activité humaine et l'environnement* est écrit afin de vous aider à comprendre les liens entre notre population, nos activités socio-économiques et notre environnement. Vous verrez, par exemple, comment les salicaires et les dreissna sont réparties à travers les eaux intérieures et quels en sont leurs effets.

**ÉTUDE DE CAS : un profil statistique du bassin hydrographique de l'Ontario est également présenté, comme étude de cas, en vue de montrer comment l'information socio-économique peut être mise en rapport avec les données physiques à un endroit donné.**

Organized in three, easy-to-read sections: Population, Socio-Economic Systems, and Environmental Conditions, this publication examines our activities from a number of perspectives:

- resource consumption
- waste generation
- monitoring the conditions of land, water, air and living organisms

This unique bestseller highlights such fascinating details as:

- purchases of potential pollutants by Canadian households
- the importance of natural resources to the Canadian economy
- energy consumption by industry

**Order your copy today!**  
*Human Activity and the Environment*, (Catalogue No. 11-509E) \$35 in Canada, US \$42 in the United States and US \$49 in other countries.

**For faster ordering call 1-800-267-6677 and use VISA or MasterCard.**

L'ouvrage est divisé en trois parties importantes : la population, les réseaux socio-économiques et l'état de l'environnement, qui examine nos activités sous différents angles:

- la consommation des ressources naturelles
- la production des déchets
- la surveillance de l'état des terres, de l'eau, de l'air et des organismes vivants

Ce best-seller unique met en relief des détails aussi fascinants que :

- les achats de polluants potentiels par les grandes maisons canadiennes
- l'importance des ressources naturelles pour l'économie canadienne
- la consommation d'énergie par industrie

**Commandez votre exemplaire aujourd'hui!**
